Great Sites To Check Out In October!

[Short Tutorial](#)

Changing The Default Search Engine On Your Browser

Dear Valued Customer

This October newsletter is an action-packed one that will keep you moving. We train you to tackle the current Storm spam attack featuring a fake NFL website. We lead you through Great Sites to help you run a marathon, navigate through a corn maze, sort through toy recalls, decipher text messaging acronyms, and redecorate your home. Finally, we teach you how to make your Inbox folder automatically appear when you open Outlook Express, and change the default search box on your browser.

The goal of each of our monthly eNewsletters is to keep our subscribers informed regarding their Internet connection and to improve their Internet experience. To meet this goal, each monthly newsletter will usually contain information related to:

1. Warnings on a recent virus, e-mail hoax, or security issue that may affect you
2. An update on new services and other local interests
3. An answer to a frequently asked Internet related question
4. Some fun, seasonal websites to check out
5. A short, step-by-step tutorial on an e-mail or browser related task

We think you'll find the information contained in this newsletter to be a valuable tool for enhancing your Internet experience.

To see what's inside this issue, take a look at the index to the left and thanks for reading!

E-Mail Hoax - Spam Campaign Targets NFL Fans

The latest Storm spam campaign has been timed to coincide with the start of the NFL season. Inboxes worldwide have received e-mails like the one below, which contain a message luring recipients to a fake NFL website with the enticement of a "Free NFL Game Tracker." It's supposed to update football fans on game results; in actuality, when users download the tracker, they download a Trojan horse and become part of a botnet (an army of commandeered computers used by attackers without their owners' knowledge).

**Don't Miss A Single game This Season...
Download Your Free Season Tracker and Stay
Up To Date With Every Game**

**Free NFL
Game Tracker**

Features:

- Live Up Date To Stats
- Real Time Team Stats
- Real Time Player Stats
- Real Time Game Updates
- Advance Game Data
- And Much Much More...

**No NFL Fan Should
Be With Out It**

Week 1 Stats

Monday, September 10	Time (EST)	Top Passer	Top Rusher	Top Receiver

According to Internet security experts, this malicious NFL spam campaign is being generated by the Storm Gang — responsible for up to 20 percent of all spam traffic worldwide. Their name refers to the "Storm worm," one of the larger Trojan horse attacks in recent years, which baited people with timely information about a deadly, real-life storm front in Europe. The Storm Gang changes the content of their attacks frequently, sometimes on a daily basis.

To help protect your computer from spam like this, make sure you use and regularly update your computer's anti-virus software. In addition, do not click on website links contained in e-mail messages from unfamiliar or suspicious sources.

Ask The Help Desk - How Do I Make My Inbox Appear When Opening Outlook Express?

Question: When I start Outlook Express, it doesn't go directly to my Inbox folder. I always have to click on the Inbox icon. Is there a way for Outlook Express to go there first?

Answer: Yes. To change this setting in Outlook Express 6.0, follow these steps:

1. Open Outlook Express.
2. Click your cursor arrow on the "Tools" menu and then drop down to and select "Options."
3. When the Options window opens, click on the General Tab. Next, put a check in the box next to "When starting, go directly to my 'Inbox' folder."
4. Click on the "OK" button. Your Inbox will now appear each time you open Outlook Express.

Great Sites To Check Out This Month

Maze Craze

http://www.cornfieldmaze.com/site_list.html - It may sound corny, but making your way through a corn maze can be a wonderful bonding moment for families. This increasingly popular form of agri-entertainment is spreading across the globe, so chances are good that there's one near you. To find a corn maze this fall, check your local newspapers or navigate through this site. It contains listings for nearly 200 locations in five countries, as well as helpful tips on how to conquer the twists and turns to make your way to the exit.

Room for Discussion

<http://ratemyspace.hgtv.com> - Fall is a popular time for home decorating projects. Are you particularly proud of your painting performance? Or feel you have a flair for furniture? You can share photos and videos of your home's highlights at this HGTV site. Just sign in, name your spaces, and you're ready to upload. Users can rate entries, post comments, and search for design inspiration by type of room.

Toy Recalls

<http://www.cpsc.gov> - Much has been in the news lately about safety hazards involving lead paint on toys. Stay informed on the latest toy recalls by visiting the U.S. Consumer Product Safety Commission site. In one convenient place, you can review all the current recalls from Mattel, Fisher-Price, and RC2, plus sign up for the CPSC's e-mail subscription lists to automatically receive notices on the product categories of most interest to you.

RU Confused?

<http://www.netlingo.com> - In the interest of speed while sending e-mail or instant messages, more and more people are talking in code. These acronyms and shorthand terms can be confusing, especially since their numbers keep growing and it's a challenge to keep up. Fortunately, it's easy to get the definitions you need here. NetLingo is an online dictionary that explains this jargon, and offers pages targeted to the needs of parents, new MySpace participants, and businesspeople.

Up and Running

<http://www.nycmarathon.org> - The ING New York City Marathon is one of the world's great road races, drawing more than 90,000 applicants including many world-class professional athletes. Organizers expect two million cheering spectators along the course, plus 315 million worldwide television viewers. This year's marathon will be held on Sunday, November 4 and you can share in the Big Apple's big excitement by visiting this site. Find details on the television and web coverage, learn about the event's history, buy official ING New York City Marathon gear -- and begin training for next year's event.

Short Tutorial - Changing The Default Search Engine On Your Browser

Rather than having to type in the URL of a search engine into your browser, newer browsers provide a default search engine box option so you can go straight to a search engine. This saves you time but the default search engine may not be the one you like to use. You can change the default search engine listed on your browser by following the steps below.

Changing The Default Search Engine In The Instant Search Box On Your Internet Explorer 7 Browser When Using Windows XP Home Edition

1. With Internet Explorer open, click on the down arrow to the right side of the search button on the right side of the Instant Search Box and select "Change Search Defaults..." from the drop-down menu. (The search button looks like a magnifying glass.)
2. When the "Change Search Defaults" window opens, click on the search engine you want from the field called "Search Providers."
3. Click the "Set Default" button and your selection will be labeled "(Default)" in the "Search Providers" field.
4. Click the "OK" button.
5. The Instant Search Box will now show the name of your new search provider.

Changing The Default Search Engine (Google) In The Search Bar On Your Firefox 2 Browser When Using Windows XP Home Edition Or Macintosh OS X 10.4

1. Click on the down arrow on the right side of the Search Bar field and select "Manage Search Engines" from the drop-down menu. (For Mac users, it will be on the left side of the Search Bar.)
2. When the "Manage Search Engines List" window opens, click on one of the other search engine choices and move it to the top of the list. This won't make your choice the default, however.
3. Click on "Google" in the list and click the "Remove" button.
4. Click "OK."
5. Your new search engine default will appear in the Search Bar field.
6. To get Google back on the list (but not as the default), click on the down arrow again and select "Manage Search Engines" from the drop-down menu.
7. When the "Manage Search Engines" window appears, click the "Restore Default" button.
8. Google will return to the list but will not be the default search engine. Click "OK."

Note: Macintosh's Safari 2 browser does not provide a way to change the Google default in its Search Bar. Safari 3, which is currently in public beta testing, will include this option.

We hope you found this newsletter to be informative. It's our way of keeping you posted on the happenings here.

Thanks for your business!

Best regards,
