COMPREHENSIVE SECURITY SOLUTION

Hargray Smart Internet Suite comes with the protection you need to help keep your users and data safe from the latest cyberattacks without slowing you down. We've got everything your business network needs to stay one step ahead of the bad guys, so you can get back to focusing on what really matters. This scalable and secure service extends the full capability of your business infrastructure, leveraging our networking expertise and resources to provide the needed benefits of an enhanced secure and protected workplace for your business.

PRODUCTIVITY FEATURES

SIMPLE MANAGEMENT
Advanced and feature-rich functionality gives insight into network activity, allowing for the rapid discovery and mitigation of persistent threats – all from a centralized console.

EFFECTIVE SECURITY
A unique set of protection qualities like application awareness, integrated intrusion protection systems and the ability to utilize external intelligence sources offers an unprecedented level of both visibility and overall security effectiveness.

BUILT FOR BUSINESS PRODUCTIVITY
Our all-in-one solution includes a firewall, a comprehensive set of industry-leading cyber security tools, and a router that is built with business productivity in mind.

ANTI-MALWARE
After your firewall, this is the next line of defense against bad things from entering your network.

THREAT INTELLIGENCE
Cybersecurity attacks are a fact of life in this hyper-connected world. Your business alone cannot gather and review the immense amount of data at risk, so you must be prepared. Hargray Smart Internet Suite services deliver the technology to stiffen your defense against the latest cyber threats.

CONTENT FILTERING
Has your business ever experienced an employee visiting an undesirable website that offended other employees, or worse, infected his or her computer with a virus? We help you block access to certain types of websites to mitigate these issues and improve your overall security and compliance.
